

TECHNICAL DATA SHEET

A medium viscosity synthetic grease for the protection of electrical and electronic connectors and contact surfaces. Water washout resistant, including saltwater.

Lubricant Properties		Typical Value
Recommended Service Range (°C):		-40 To 135
Base oil:	Type	Polyalphaolefin
	Kinematic Viscosity (100°C)	38 cst
		(40°C)
	Viscosity Index	150
	Flash Point	°C 300
	Pour Point	°C -30
Colour and Appearance:		Clear (blue under uv light)
